

Dear colleagues,

Each year, the European Society for Clinical Investigation (ESCI) organizes its Annual Scientific Meeting (ASM) in a different location in Europe. After the successful comeback to face to face meeting in Bari, Italy, the 57th ASM will take place on 7-9 June 2023 in Prague, the capital of the Czech Republic.

The ASM will open with the unprecedented keynote lecture given by the Nobel Prize winner for 2019, Prof Gregg Semenza. The meeting will feature state-of-the-art plenary lectures, oral presentations, poster sessions as well as pre-courses educational sessions. The motto of the 57th ASM is "Envisioning the future of clinical and experimental investigation in Europe and beyond". Indeed, ESCI's culture is to bring together fundamental and translational researchers as well as clinicians from Europe and worldwide with the common aim to build a solid bridge between basic research and clinical applications. The ASM will be a platform of exchange and discussion of the latest advances in science and will promote professional networking opportunities.

The 57th ASM will again cover a broad area of research and will include diverse symposia such as mitochondrial biology, cardiovascular and metabolic diseases, endocrinology, Hepatology & Gastroenterology, Regenerative Medicine and Gene & Cell Therapy, Reproduction Biology, Embryonal Pathology, Personalized & Gender Medicine, Gut Microbiota and bioinformatics. As for tradition, the ASM will be closed with the multi-focus session that includes the presentations of different awards and outstanding keynote lectures.

The ASM in Prague is planned as an in-person meeting, and no virtual participation is foreseen for the scientific sessions. However, the organizing committee will adapt the meeting format according to unpredictable happening in the world and the legal requirements.

It is our great pleasure to invite you young and senior scientists, clinicians, industry exhibits to join us in Prague. Submit your contributions and share your research with your colleagues. Together let's shape the future of research in Europe and worldwide.

Be part of it! Be ESCI !
